## EXPERIENCE

### Backend Developer

Avanzo CyberSecurity Solutions|Dec 2024 Present

Develop and maintain secure, scalable backend systems.

Implement APIs and integrate with front-end services.

Ensure data security, optimize performance, and troubleshoot issues.

### Software Developer

Oneteam Solutions Edtech Pvt Ltd. | Apr 2024-Aug 2024

Worked on TrackerJet, a live project focused on back-end development using Python Django, gaining hands-on experience in building robust APIs, database management, and optimizing server-side functionalities.

### Freelance Software Developer

Bio Silicon Labs. | Oct 2024-Dec 2024

Developed a fully functional website using Python Django, MySQL, HTML, and CSS.

Designed and implemented key features to enhance user experience.

### BookApp

- Fetches and displays book data using Google Books API. (React, HTML, CSS)

### Weather App

- Displays real-time weather data, trends, and alerts. (Django, WeatherAPI, HTML, CSS)

### Blog Application

- CRUD operations for blogs, built with Docker. (Django REST, React, Tailwind CSS)

### TaskManagement System

- Developed a Task Management System using Django REST Framework (DRF) for the backend and React for the frontend. Secure task management with JWT authentication. (Django REST, React)

### Hospital Management System

- Developing a Hospital Management System (HMS) at Avanzo CyberSecurity Solutions to streamline patient management, appointments, billing, and medical records. Responsible for designing secure APIs, backend integration, and data flow, while ensuring scalability, performance, and data security using Python, Django, and MySQL.
