INTERNSHIP

Python Full-stack Developer
Oneteam Solutions Edtech Pvt ltd. | Oct 2023-Aug 2024

- I have applied my Python expertise to develop dynamic web applications, leveraging frameworks such as Django for robust back-end functionality. By proficiently integrating front-end technologies like HTML, CSS, and JavaScript, I deliver seamless user experiences across various projects.

PROJECTS

Wheels4u
- Created a Car rental website The project allows users to browse available cars, view details, and book rentals.
- Frontend: HTML, CSS.
- Backend: Python Django

Resume Builder
- Designed and developed a resume builder application. The application allows users to create, edit, and download professional resumes in PDF format.
- Backend:Python Django
- Front-end:HTML, CSS

Navflix(OTT platform)
- Developed a comprehensive OTT platform that users can watch films by subscribing with plans, integrated Stripe for subscription payments, and ensured responsive design
- Backend :Python Django
- Frontend : Html, Css

BookApp
- Created a Book Application that fetches and displays book data using the Google Books API , React , Html , Css

Weather App
- Developed a weather app using Python, Django,Html,Css and WeatherAPI to display real-time weather data,trends,and alerts for extreme conditions.

TaskManagement System
- Developed a Task management system using Django REST framework(DRF) for the backend and react for the frontend

Blog Application
- Developed a Blog Application using Django REST framework(DRF) for the backend and react for the frontend,Tailwind Css ,Docker
